Rack2-Filer

Getting organized with Rack2-Filer is easy and enjoyable. With the push of a button, you can scan your documents directly onto the Work Area or inside an open e-binder. Rack2-Filer also accepts digital content created by other software such as spreadsheets, presentations, and word processing files. But for even greater flexibility, if an application can print, you can select the Rack2-Filer ImageWriter to quickly create e-binders containing images of your e-mails, web pages, on-line financial statements, technical manuals and much more.

Rack2-Filer provides several tools to keep your content organized, presentable, and accessible. Here are just a few features inside Rack2-Filer:

- In the cabinet view, easily move e-binders from one cabinet or library to another. Use color-coding and distinctive text or graphics to enhance the appearance and organization of binders.
- Inside the e-binders, add custom divider sheets to keep sections organized. The index page at the front automatically updates with what is typed on the tab.
- Use the highlighting tool to emphasize important sections. Attach sticky notes to serve as reminders or bookmarks to jump back and forth. Add hyperlinks to provide one click access to web sites. Place stamps to enhance communication.
- Built-in Optical Character Recognition (OCR) engine makes content searchable. Simple and advanced search features allow for fast location of information by word, phrase or number.
- The Work Area is like a virtual desk that allows you to drag and drop pages in and out of e-binders for amazing re-organizing control.
- With Rack2-Filer, there are several ways to share your content with others such as exporting to PDF format, sending to a printer, or attaching directly to e-mail.
