Get right down to business with a user-friendly interface

Designed with office productivity in mind, this easy-to-use interface lets you quickly set up and review selected settings, then preview and modify your images before saving the scan. You can save as a PDF, JPEG, or text file, and then store locally, on a network folder, or in the cloud. Or, you can easily send as an attachment via email. Predefined shortcuts are provided for common scanning tasks.

Add value by customizing results

For one-time or repeating jobs that need specific settings, you can easily modify one of the predefined shortcuts. Just select an existing shortcut and change settings as-needed (for example, select color instead of black-and-white). With a click of the mouse, you can save the modified shortcut settings, or discard all changes.

Create new shortcuts for the types of scan jobs you perform most often, with settings such as paper size, resolution, file format, destination, and more. Name the shortcuts to reflect the type of document, the task being performed, or whatever best meets your needs.

Simplify document capture

Use the convenient built-in scan shortcuts or create your own customized shortcuts to make common scanning tasks quick and easy.

Turn scans into editable/searchable text (OCR)

HP Scan includes embedded Optical Character Recognition (OCR) technology from I.R.I.S., a long-standing OCR developer. OCR allows you to convert scanned images to common file types—including PDF—with editable and searchable text. OCR capabilities also enhance the indexing and retrieval of documents.

Choose your output document format

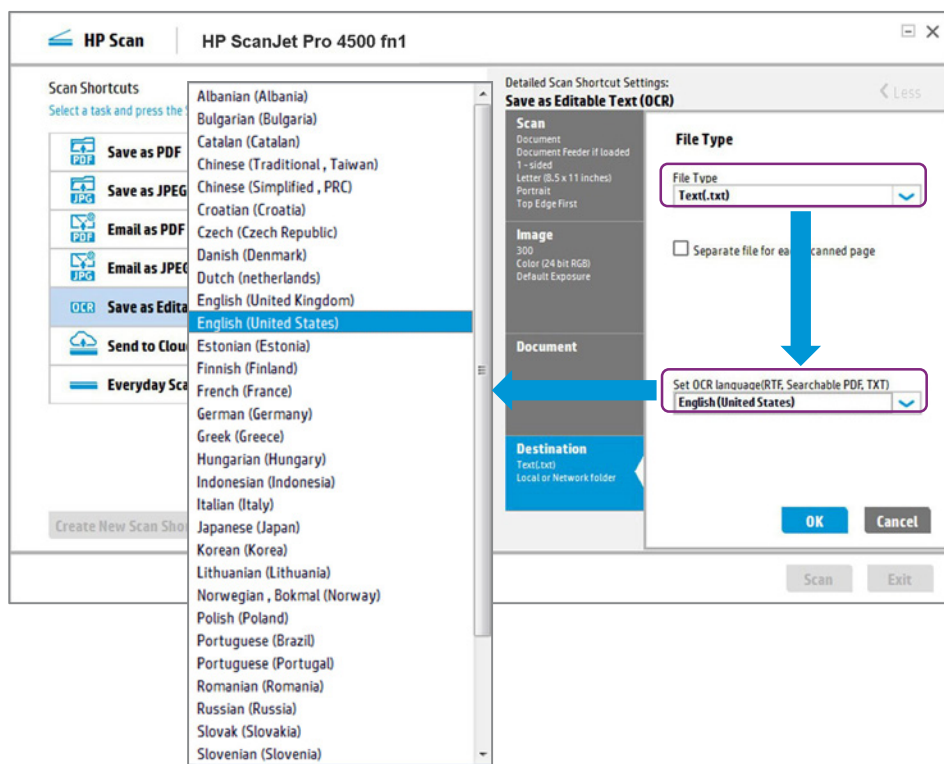

When you select **Save as Editable Text**, you can choose either **Rich Text (.rtf)** or plain **Text (.txt)** format.

- **Rich text (.rtf)** is a file format supported by Microsoft Word and most other word processing programs. Some of the original formatting is saved using this option.
- **Text (.txt)** creates an ASCII text (TXT) file that can be opened in any word processing program. The original formatting is not saved with this option.

Select OCR language

HP Scan's optical character recognition software is able to recognize 36 different languages. To access the language dropdown, click **More**, **File Type**, **Set OCR language**.

Save customized shortcuts

Quickly scan using your most-used settings—then save the settings as a new shortcut. Now you can consistently execute jobs at the touch of a button.

Save changes to a pre-defined shortcut

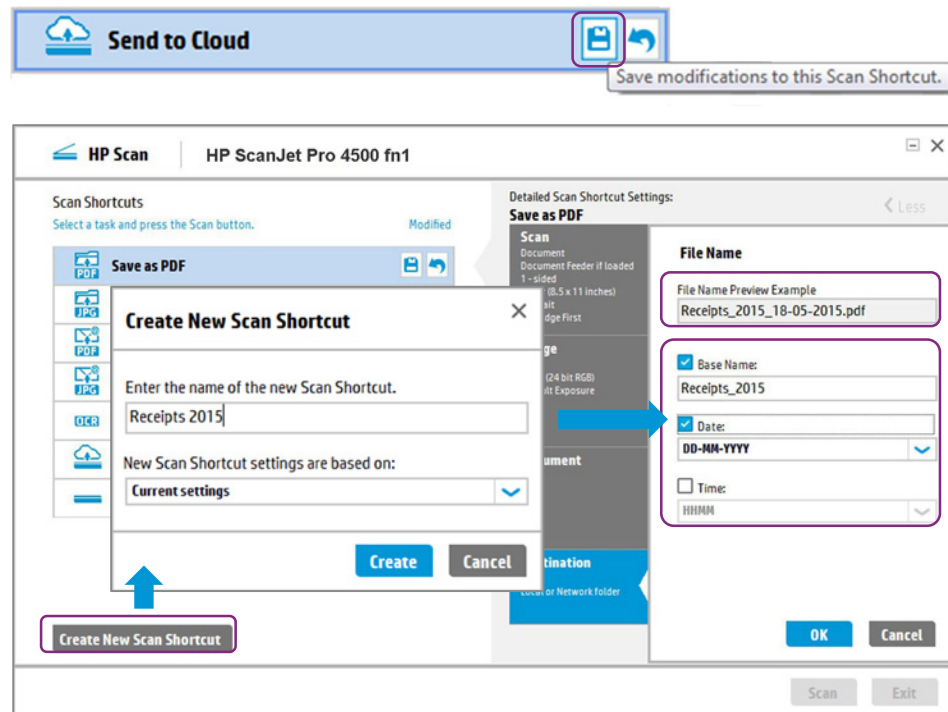

A fast way to make a new scan shortcut is to set up all your desired settings and click the icon **Save modifications to this Scan Shortcut**. You can do this at any time, even after saving the scanned image.

Create a new shortcut

Another method is to click **Create New Scan Shortcut** at any time. HP Scan will prompt you for a shortcut name and ask if you want to base the new shortcut on the current setting or any of the other defined shortcuts. You can customize the shortcut as needed, including such things as specifying a **Base Name** for the output file, adding a **Date** and **Time** stamp, etc.

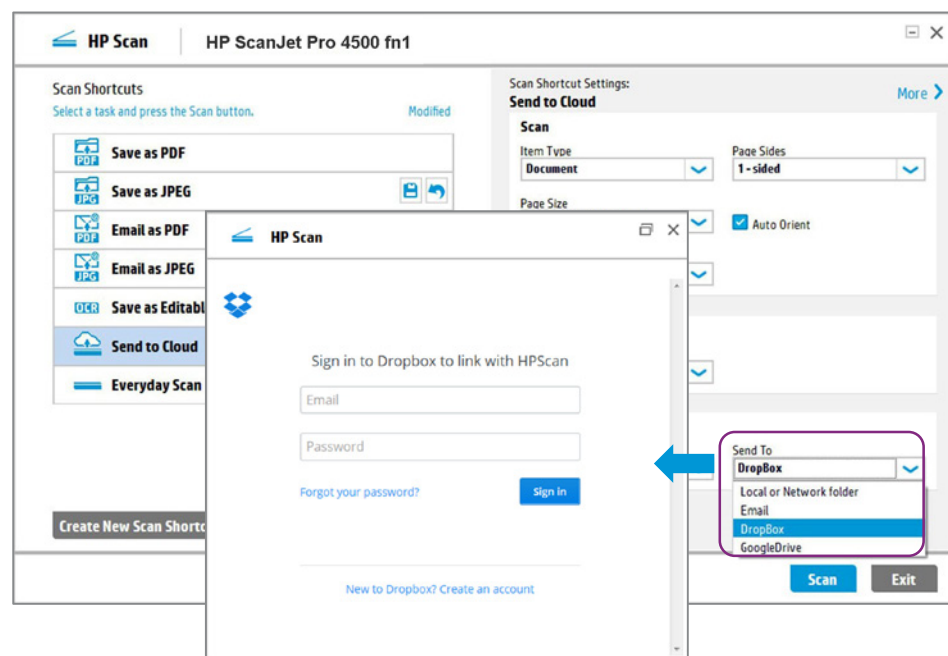

About Everyday Scan

This predefined shortcut is intended for you to use for quick one-time tasks. All scan settings are available in this shortcut, giving you the flexibility to modify any settings needed. After using, you can quickly undo any changes or save them for the next session.

Send scans directly to email or the cloud

HP Scan allows you to easily send your scans directly to an email recipient or to cloud-based storage locations.

Page-by-page confidence

Help avoid missing pages and misfeeds. HP EveryPage¹ delivers smoother paper handling for jobs of all kinds. Load stacks of documents—even mixed media sizes and types—and trust your scanner to do the rest.

Scan with confidence with HP EveryPage

Have confidence that your documents are reliably scanned with HP EveryPage, a set of innovative technologies created to provide a dependable on-ramp to your digital workflow. These technologies provide reliable scanning of almost any document type, even mixed stacks of different paper sizes and weights. Whether you scan business documents or even ID cards, HP EveryPage delivers the peace of mind that comes with knowing that you'll never miss a page.

HP EveryPage delivers smoother paper handling for jobs of all kinds:

- Rely on simple, hassle-free scanning for nearly any kind of input, including mixed stacks of documents—no more time wasted sorting stacks into like sizes and types.
- Minimize your downtime due to misfeeds and stoppages with precise, variable pick technologies that accommodate a variety of input types and sizes and deliver fast, efficient scanning.
- Enjoy peace of mind, knowing that all of your data has been captured—HP EveryPage employs innovative safeguards in the event of a misfeed or stoppage.

Ultrasonic multi-feed detection—how does it work?

One component of HP EveryPage is the ability to automatically detect multiple feeds to help ensure that all pages are scanned. Sound waves are used to verify that a single sheet has been separated from the stack for processing, helping eliminate the need to count the number of pages fed to make sure it matches the number of scanned pages.

In the event that the ADF is unable to pick a page, or if multiple pages are pulled into the paper path, the feeding process stops and the device notifies you of the error. Pages that have already been scanned are stored in memory, which means that you don't have to restart your scan from the beginning.

Here it is in a nutshell:

- Ultrasonic waves are high-frequency (inaudible) sound.
- The sound waves pass easily through a single sheet of paper.
- If two sheets overlap, the small air gap between them reduces the signal at the receiver. The device senses that reduced signal, stops, and then alerts the user on the computer screen.

Specify misfeed exclusion area

HP Scan software allows you to specify a region of the scan to be excluded from multi-feed detection. If the scanner detects an area with extra thickness anywhere on the page that is within the length you specify, it will ignore detection for that portion. This is a great feature when you need to scan documents that have sticky notes or a memo attached.

Notes

¹ HP EveryPage is referred to as HP Precision Feed on HP ScanJet devices introduced prior to May 2013.

² Requires the HP JetAdvantage Capture App. Download the app at hp.com/go/documentmanagement. Wireless performance is dependent on physical environment and distance from access point and may be limited during active VPN connections. Wi-Fi Direct scanning requires the mobile device be connected directly to the Wi-Fi network of the scanner.

³ Destination PC must have driver and software installed and must be on the same network as the scanner. Up to 10 PCs can be registered at one time.

⁴ Scan speeds of up to 60 ipm (30 ppm) measured at 300 dpi (black and white, grayscale, and color). Actual processing speeds may vary depending on scan resolution, network conditions, computer performance, and application software.

⁵ Scan speeds measured at 200 dpi, black and white, grayscale, and color. Actual processing speeds may vary depending on scan resolution, network conditions, computer performance, and application software.

⁶ HP Auto-Off technology capabilities subject to device and settings.

⁷ Power requirements are based on the country/region where the scanner is sold. Do not convert operating voltages. This will damage the device and void the product warranty.

⁸ EPEAT Silver registered model of this product is available where HP registers imaging and equipment products.
