RE: Ricoh fi-8700 Series

Date: October 9, 2026

PRODUCT ANNOUNCEMENT

PFU America Inc. (“PAI”) is pleased to announce the launch of the new RICOH fi-8700 production document scanner, designed to help organizations efficiently capture high volumes of mixed, challenging, and exception documents.

Building on the trusted foundation of the RICOH fi Series, the fi-8700 combines production-class scanning at up to 100 pages per minute, reliable paper handling, and new Gigabit LAN connectivity with a flexible, intuitive design. A straight paper path, broad media support, and intelligent paper-protection technologies help operators process everything from thin sheets and standard business documents to envelopes, cards, long documents, and other difficult originals.

For workflows that extend beyond loose-sheet scanning, the fi-8700 includes an integrated flatbed for bound, fragile, oversized, and specialty documents. New Open-Cover Scanning, Timer Scan, and Multi-Crop functionality reduce repetitive operator steps and help organizations digitize a wider variety of records more efficiently.

fi-8700

- Scans up to 100ppm / 200ipm with a 300-sheet automatic document feeder.
- New Gigabit LAN connectivity supports flexible, centralized deployment.
- Handles a wide variety of documents from 20 to 413gsm, including thick, long, folded, and irregular media.
- Intelligent paper handling and protection technologies support reliable capture while minimizing interruptions and document damage.
- The integrated flatbed adds efficient capture of bound, fragile, and specialty documents with Open-Cover Scanning, Timer Scan, and Multi-Crop capabilities.

Additional Bundle Offerings

PFU America is also pleased to introduce new **Premium Bundle** and **FADGI Compliant Bundle** configurations for the fi-8700.

The Premium Bundle combines the award-winning fi-8700 production scanner with RICOH ScanCare Service, including genuine consumables, cleaning supplies, preventative maintenance, and end-user training delivered by certified professionals to help maximize scanner uptime and performance.

The FADGI Compliant Bundle is designed to support organizations requiring FADGI-compliant image capture workflows. The bundle includes the tools, software access, installation, calibration, training, and service components needed to help achieve FADGI MTR compliance levels and support stringent records digitization requirements.

Each FADGI Compliant Bundle includes:

- GoldenThread Device Level Target
- Access to RICOH Document Scanner FADGI Calibration Software/Driver Manual
- On-site installation and calibration
- End-user/operator training
- 1-Year ScanCare NBD Onsite Service, including preventative maintenance and consumables

**RICOH FADGI Compliant Document Scanner Bundles require the use of PaperStream Capture software for scanning FADGI-compliant images.*

**This FADGI-compliant RICOH document scanner requires the use of RICOH document scanner FADGI calibration software, GoldenThread Device Level Target (included), and Image Science Associates (ISA) "GoldenThread Analysis Software" (not included).*

Please use the information below to set up these products in your ordering system and sales infrastructure.
